Allowable Subject Matter

1. Claims 1-2, 4-8, 10-14 and 16-20 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach a communication network control method for a synchronous communication network including a hub and a plurality of user nodes that communicate with the hub via a satellite, said method comprising steps of, transmitting a first plurality of symbols in a frame from the hub to a first user node of the plurality of user nodes using a first modulation and a first forward error correction and transmitting a second plurality of symbols in the frame from the hub to a second user node in the plurality of user nodes is using a second modulation and a second forward error correction wherein a degree of constellation rotation for the first symbols is equal to a degree of constellation rotation for the second symbols as substantially described in independent claims 1,7,13, 19 and 20. These limitation along with any other limitation found in claims 1,7,13,19 and 20 are neither taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
